Microsoft Audience Network ad effectiveness

Microsoft Audience Ads exposure improves downstream brand awareness, consideration and purchase

Notes: Results may vary for each advertiser based on campaign settings, targeted audiences and other factors. Lift metrics represent an average of advertisers with completed lift studies to date (Sept. 2020). These advertisers are a non-representative sample of all advertisers in the marketplace. Verticals represented include Retail, Technology & Telecommunications, B2C Services, and Food & Grocery. Lift measured between exposed users and a control group of eligible unexposed users, with lift represented on a per-user basis. Average user count per advertiser study = 1.98M, data collected May-Sept. 2020.

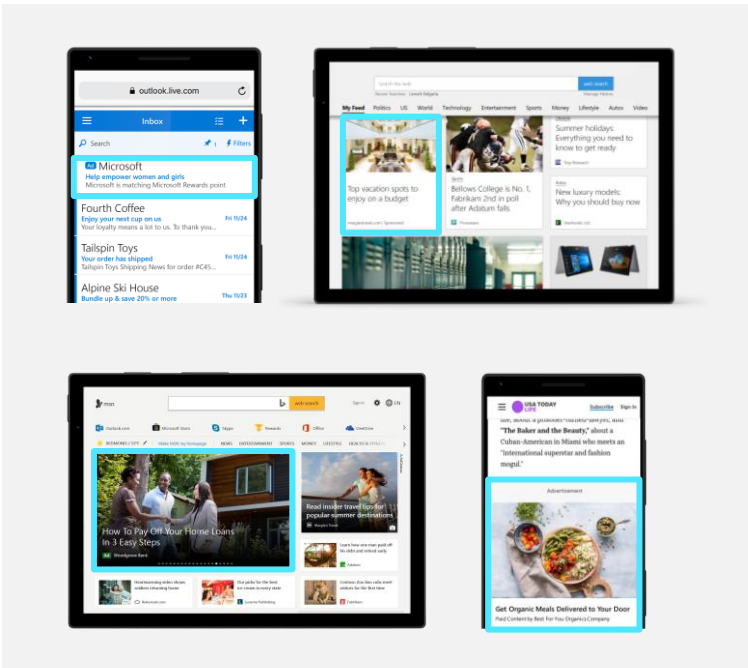

In-market Audiences drive the highest post-exposure impact to user journey stages

	Remarketing audiences 	In-market Audiences 
AWARENESS	+112%	+239%
CONSIDERATION	+335%	+664%
PURCHASE	+479%	+1,318%

Data points represent lift on a per-user basis. Average user count per advertiser study = 818K, data collected May-Oct. 2020.

Next steps

Seven steps for success

● **Launch evergreen campaigns** 1-2 weeks ahead of high impact dates. Build history and remarketing pools to maximize volume and amplify during high impact timeframes.

● **Launch standard Shopping campaigns right away since you don't need UET++.** Expand volume for product ads while you work to update the tag to take advantage of Product Audiences.

● Stay top of mind by **setting up targeted image-based campaigns in addition to Shopping.** Run Remarketing and Product Audiences to remind consumers of products, promotions and offers.

● **Limited time promotions work** but be sensitive to current events. **Refresh and test creative more frequently to avoid fatigue.**

● **Use Shared Budgets and set up Automated Rules** to maximize volume on top priority strategies during your promotional period.

● Don't be afraid to **bid aggressively in the beginning** to allow our system to learn your campaign, **optimize after the first 10 days, then 1x per week.** We're here to help!

● Drive increased performance by **implementing enhanced UET** to Dynamically retarget product ads using the specific product that the user engaged with.

Shopping Campaigns on Microsoft Audience Network: five steps to set up

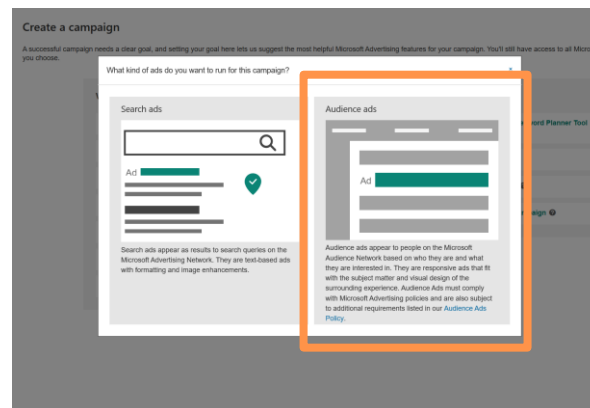

Enhanced UET not required, campaign creation in two minutes or less!

1.

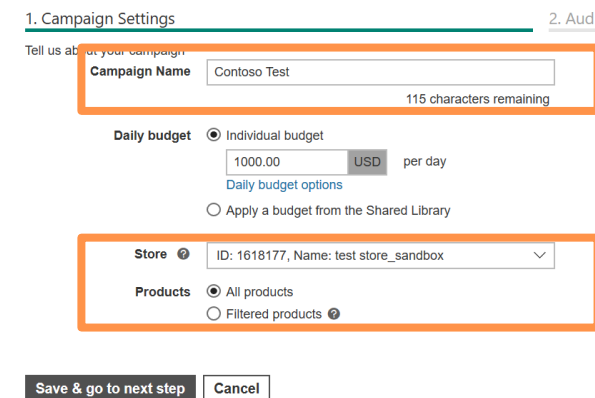

Select **Create New Campaign** and select **Sell Products From Catalog**

2.

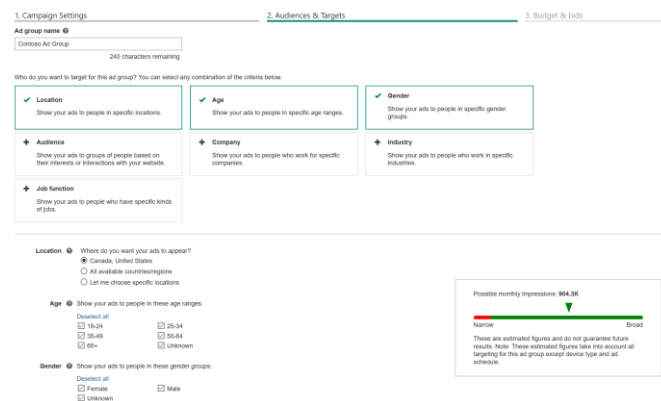

Select **Audience Ads** option

3.

Set **Campaign Name**, choose **MSC store** and select **All Products** filter. We recommend no product filters to maximize volume.

4.

Set **Audience Targets**. Any audiences should be layered on as "bid only" to maximize volume.

5.

Set **Daily Budget** and **Default Bid**. We recommend ~10% of search shopping spend as a starting point and a minimum of \$1.50 bid to start. Click **Save** and **LAUNCH**.

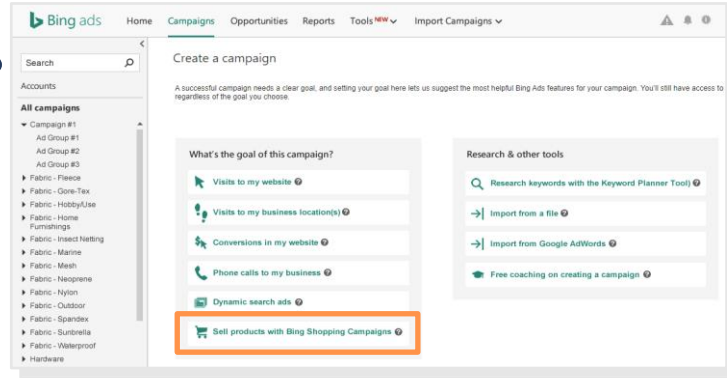

Important tips to remember

- Customer must have an active shopping feed and be enabled in Microsoft Audience Network to launch
- Even though Enhanced UET is not needed, customer must have a UET tag in place to launch
- Allow 24-48 hours for delivery to begin ramping

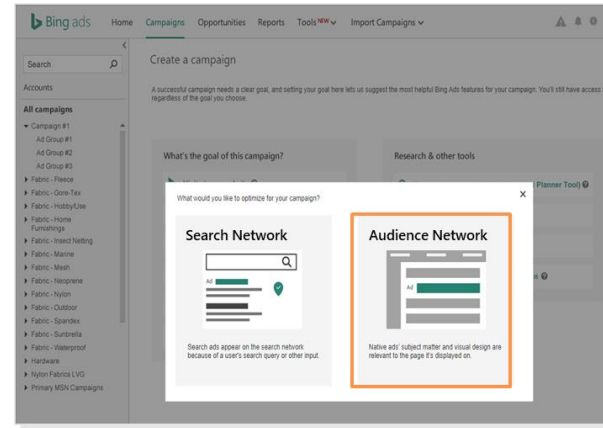

Shopping and Product Audiences – setup steps

Enhanced UET implementation required
