Forecasting the return to “normalcy” in 2021

Microsoft Advertising. Intelligent connections.

It's been slightly over a year since the declaration of the COVID-19 pandemic forced a nationwide lockdown in February 2020, and we are just now turning a corner to get back to "normal."

As we progress to “normal,” what impact will this have?

Distribution of vaccinations on the rise with 3 approved vaccines

Businesses are opening back up to full capacity

Non-essential workers are returning to the workplace

Schools are resuming in-person learning to finish out current year

Mask and personal protection measures are still in place

Our analysis forecasts search demand by sub-vertical regarding:

Past search
volume (actual)

- January 1, 2020-
March 17, 2021

Forecasts that
do not factor
in the effect of
COVID-19

Forecasts
factoring in the
effect of
COVID-19

Taking precautions for returning to life like we had before COVID-19 while also preparing for another wave has become the “new normal.”

Demand for testing and protection should continue to rise

Scientific equipment and services forecasted search volume

Black shows actual search volume.

Grey is the expected search volume forecast without the effect of COVID-19.

Green is forecasted volume with heavier weightings on COVID-19 case data and its past relationship with volume.

Pink is forecasted volume with lighter weightings on COVID-19 case data and its past relationship with volume.

Blue is forecasted volume with lighter weight on COVID-19 case data and greater sensitivity to variance on shorter time frames.

Single-use prints for sanitary measures and the return of events will have impacts on printing demand

Takeaways

eCommerce and digital demand should remain strong as low contact shopping brings convenience

Remote and hybrid models implemented during the pandemic should continue as this flexibility is helpful when opening back up

The risk of another wave/shutdown will continue to heighten the demand for protective and preparation products
