Australian 2021 New Car Sales by calendar month

Source:
Surge in demand within Australia’s used car market

1. Shifts in people’s travel preference to avoid public transport fuels increase in demand for cars

2. Low stock of new cars within Australia and long waits have caused demand to spill into the used car market

3. Significant rise in prices have resulted, due to the low used car stock in dealerships

Data Source: ABS Lending Indicators January 2021
Used car searches are up 271% compared to pre-COVID19 and rising

**Recommendation:**

1. Build your brand presence early, by bidding on used and second-hand keywords

2. Advertise with premium calculators on both comprehensive/Compulsory Third Party (CTP) cover

Generic queries and Microsoft Audience Network play a key role in the early to late stages of a user’s search journey.

**Recommendation:**

1. Use a combined generics + Microsoft Audience Network strategy to increase your brand’s exposure in the early research stages.

2. Combine that with remarketing audiences to ensure your brand’s presence until conversion.

Autos Ad Effectiveness Study

Users exposed to both Microsoft Search ads & Microsoft Audience ads are more likely to visit an Auto advertiser’s website compared to those who are exposed to only one type of ad.

Notes: Results may vary for each advertiser based on campaign settings, targeted audiences, and other factors. Lift metrics represent an average of all advertisers with completed lift studies to date (Feb. 2021). These advertisers may be a non-representative sample of all advertisers on the marketplace. Lift measured between exposed users and a control group of eligible unexposed users, with lift represented on a per-user basis. Average user count per advertiser study = 795K
We set out to prove that users exposed to Microsoft audience ads engaged with brands at a higher rate

Financial Services Ad Effectiveness Global Study

- **Awareness**: 1.8x
  - Lift in brand awareness per user, measured by post-exposure brand search rate

- **Consideration**: 1.9x
  - Lift in brand consideration per user, measured by post-exposure domain visit rate

- **Conversion**: 4.0x
  - Lift in brand purchase per user, measured by post-exposure conversion page visit rate

Notes:
- Results may vary for each advertiser based on campaign settings, targeted audiences, and other factors. Metrics represent an average of all Financial Services advertisers with lift studies to date (Feb. 2021).
- These advertisers may be a non-representative sample of all advertisers on the marketplace. Lift measured between exposed users and a control group of eligible unexposed users, with lift represented on a per-user basis. Average user count per advertiser study = 1.07M.
Ensure your CTP campaigns are prepared for high volumes in May and June

Key Observations

1. CTP and green slip generic searches are ~23% higher in May and June compared to the monthly average throughout the year.

2. Monthly searches in 2021 year to date are ~26% higher YoY.

**How to read the chart:**
The **darker** the opacity highlights:
1. The higher the **search volumes** are relative to the monthly average
2. The higher the **CPC** relative to monthly average
3. The more **budget weighting** is recommended

**Tip:** Check your IO’s and campaign budgets to make sure you’re not capped this EOFY!
Seasonal budget recommendations per account for Auto Insurance

Recommended budget allocation for seasonal period*
represented as % difference vs baseline monthly spend

Budget recommendation calculated through factoring in the increased volume and cost per clicks per month throughout the year, modelled off normalised 2019 and 2020 data, with month patterns weighted towards 2019 data.

Data Source: Microsoft internal data | Auto Insurance | 2019 & 2020 | Searches and CPCs | All Devices

Recommendations:
+30-50% spend:
- Placing greater focus on new and existing generic keywords
- seasonality adjustment
+ 10% spend Upper Funnel Targeting
+ 10% spend Investment in Audience Ads

April baseline spend $  
May $ baseline + 60%  
   $ baseline + 70%  
   $ baseline + 50%  
   Jun  
   Jul
Australian’s intent to purchase cars have steadily risen, driven by shifts in transport preferences due to the pandemic. This leads to higher demand for auto insurance.

The Microsoft Search Network has seen strong recovery in 2021 across both the automotive and insurance categories, with KPIs improving YoY.

Our users are less brand-oriented and shop around for deals during the EOFY season, seen by the higher proportion of generic searches and clicks during this period.
Key Takeaways and Actions

1. **There is abundant demand within the automotive industry for new and used cars.** In a high demand environment for vehicles, insurance advertisers need to be active and establish strong brand presence for the EOFY season.

2. **Generic queries are specifically important during EOFY.** Average April weekly generic searches are up 63% YoY, while clicks are up 67%, highlighting the focus towards shopping around for deals during this period. Make sure to focus on your generics strategy by targeting new keywords and increasing investment in existing keywords.

3. **The Audience Network is great for creating brand awareness in the upper stages of the purchase channel.** Implement a combined generic keywords + Audience network strategy to increase exposure to potential buyers and drive lift in awareness, consideration, and conversion.
