## Restoration strategies

### Ads

- Ad rotation should be set to [optimize](#).
- Check your editorial rejections as COVID-19-related terms are disallowed.
- Begin the (required) move to [Expanded Text Ads](#) and add Responsive Search Ads (RSA) to your ad groups as an efficient way to swiftly change your text ad messaging.
- Use ad customizers and IF functions where applicable. Use audiences to land effective messaging.
- Shopping: Use Local Inventory Ads to indicate availability of items and adjust product group bids based on inventory changes.
- Shopping: As your inventory levels grow, re-evaluate your product group strategy and product prioritization to meet your campaign goals.
- Check the extensions you're using. Use "delivery, curbside pickup, other services" that are unique and applicable to your business.

### Keywords

- Monitor keyword recommendations specific to your account surfaced in Microsoft Advertising user interface.
- Continue to use "Broadience" (broad match + audience targeting) to help you expand reach and identify new opportunities after the initial period of greater volatility has passed.
- Reevaluate strategy on keywords around delivery, curbside pickup, fees waived (COVID-19-terms are restricted).
- To capture newly emerged queries, create or reactivate Dynamic Search Ads (DSA) as a "catchall" with a lower bid and use tools like [Microsoft Advertising Intelligence](#) and [Keyword Planner](#).

### Audience

- Reevaluate Remarketing list frequencies (ex: 1, 3, 7, 14, 30 days) to target customers still looking to purchase.
- Use In-market Audiences to target customers who are in-market for your product (especially for areas of opportunity for you).
- Use Product Audiences (dynamic remarketing) to maximize the performance of your shopping ads.
- Create a separate Audience Ads campaign to reconnect with your ideal audience in high-quality and brand-safe native placements.
- Add images to your search campaigns to expand your audience reach and drive increased performance.
- Refine targeting settings to reflect consumer trends for your business around geographies, time of day, etc. Use the [Bing COVID-19 Tracker](#) to help.

### Bidding

- Once the market has "leveled" out and fluctuations have lessened, begin moving back to automated bidding with adjusted targets.
- When using manual bids, monitor SOV to adjust bids and leverage ECPC.
- Ensure you are setup for real-time success if you are re-entering the auction by leveraging first page bid recommendations in the UI.

### Budget

- Begin planning for increases (or decreases) in campaign budgets as the markets shifts from greater volatility to a new normal.
- Monitor SOV to adjust budgets based on new trends, inventory, etc.

## Restorations strategies

### Retail & Shopping Campaigns best practices

#### Feeds

- Send a complete feed with all product offers and include recommended fields – GTIN, MPN, Brand, Color, Size, Shipping Cost, Multiple Images, and more
- Optimize product titles and descriptions for improved product matching and relevance. Use the Search Term Report at the offer level for relevant terms to include and test.
- Leverage Custom labels in your feed to customize your product groups to meet your business goals.
- Import your Google product offerings to Microsoft Merchant Center to mirror your campaigns from Google.
- Schedule automatic downloads of product feeds to keep your prices and inventory fresh.
- Once stores open again, use Local Inventory Ads to drive traffic to your physical stores. Also a great option for the Shop online, pick up in store trend.
- Schedule your Merchant Promotions and include any relevant promotional codes.

#### Merchant Center

- Opt into Automatic item updates for price and/or availability to ensure your Product Ad details match the customer experience on your landing pages.
- Use the new List view for ad groups to easily see your product group taxonomy and make bulk operations to your product groups like bid changes by percentage or filter products.

#### Audience

- Campaign priority settings (low, medium, high) give you more control over which campaigns and products take precedent
- Product Audiences (dynamic remarketing) can help you take your shopping ads to the next level with increased performance.
- Use Product Ads on the Microsoft Audience Network to expand your reach and get your products in front of customers where they are today.

#### Reporting

- Review share of voice metrics with Click share and Absolute top impression share reporting to see how traffic volume compares to your competitors.
- Use the Product match count reporting to identify product serving issues within your feed and campaigns.
- Easily add negative keywords from your search term reports to filter unqualified traffic to your Product Ads.
- Regularly review your Product negative keyword conflicts report to ensure negative keywords are not limiting how your Product Ads are serving.
- Check your feed error reports to trouble shoot rejections and resubmit corrections.
- Review the Untargeted offers report to confirm all product offers are targeted by a campaign. An All Products as a catch-all bucket for new products or low-bid products is recommended.

#### Bidding

- Balance between using automation and manual reviews. Monitor [auto-bidding](#) but keep a close eye to adapt to a fluctuating marketplace.
- Adding Enhanced CPC will leverage auction-time signals and increase the likelihood of clicks driving conversions.
- Test new auto bidding pilots for Shopping: Maximize Clicks and Target Return on Ad Spend (ROAS)

#### Budget

- Plan budgets to meet the increased traffic demands by monitoring SOV.
- Allocate additional budget to your current best-performing and products.
- Monitor your daily budgets and adjust as needed with the changing environment.
