- Shopping: Keep your product feed files up to date as product inventory and prices may change rapidly.
- Automatically test different messaging by adding Responsive Search Ads (RSA) to your ad groups. Add assets with "delivery options."
- Check your editorial rejections as COVID-19-related terms are disallowed.
- Check your text ads. Replace any standard text ads with [Expanded Text Ads](#) and RSA (standard text ad volume will begin to decline April 1).
- Search partners: Review publisher reports to optimize performance on the search partner network.

### Keywords

- Use "Broadience" (broad match + audience targeting) to help you efficiently expand reach and identify new opportunities.

- Review your search term reports for emerging queries to add as keywords or add negatives to avoid poor performance.
- To capture emerging queries, create or reactivate Dynamic Search Ads (DSA) as a "catchall" with a lower bid and use discoverability tools like [Microsoft Advertising Intelligence](#) and [Keyword Planner](#).
- Revamp your branded strategy and consider broad match on your core brand terms to cover highly relevant emerging queries.

### Audience

- Create Remarketing lists with more recent frequencies (ex: 1, 3,7, 14, 30 days) to target customers still looking to purchase.
- Use In-market Audiences to target customers who are in-market for your product (especially for areas of opportunity for you).
- If you're using Shopping Campaigns, make sure you have Product Audiences (dynamic remarketing) set up to help increase performance.

- Add images to your search campaign, so your ads can serve on the Microsoft Audience Network and get in front of more potential customers.

### Bidding
